

Sessions and pricing to meet your budget. No high-pressure sales practices and transparent pricing structure. You will get only what you want!! A combination of a session fee, digital files, prints, albums and gift products in an al-a-carte structure that provides solutions to fit any need.

Why order prints if I get the file? The print pricing has been discounted greatly and provides you with professionally printed prints that guarantees the same care that goes into the image creation that results in a professional image. From the beginning of the image capture process I take great care to custom white balance ensuring proper colors as well as to capture a proper exposure ensuring the proper tone and dynamic range. When editing, I edit on a professional caliber monitor calibrated for proper colors and range. Having your images printed from a professional lab ensures the same standards to image quality and care are followed through to the final print. The print will also have a lustre coating for protection from finger prints and dust as well as styrene mounting for images 11x14 and greater.

BEST VALUE: SAVE over \$1000
